

## ACKNOWLEDGEMENT

I am immensely grateful for the support, guidance, and encouragement I received throughout the successful completion of this AICTE Activity Project. The satisfaction and sense of accomplishment associated with this work would not have been possible without the contribution of several individuals and the institution that consistently motivated me during every stage of this activity.

I consider it a privilege to be a part of the *Impact College of Engineering and Applied Sciences* family, an institution that has always inspired students to learn, grow, and take up socially impactful initiatives. I extend my heartfelt gratitude to **Dr. Kaipa Sandhya, Head of the Department, Computer Science and Engineering (Data Science)**, whose constant encouragement, valuable suggestions, and insightful guidance helped me channel my efforts in the right direction.

I also express my sincere thanks to our Management and our respected **Principal, Dr. Jalumedi Babu**, for providing continuous support, necessary resources, and a conducive environment for carrying out this project successfully.

I extend my sincere thanks to **Mr. Ramesh , Assistant Professor of Mathematics**, who served as my report guide. His insightful suggestions, patient guidance, and constructive feedback greatly enriched the quality of this work. His dedication and support throughout the preparation of this report have been invaluable.

Finally, I am thankful to all faculty members, participants, community members, and everyone who directly or indirectly contributed to the smooth execution of this activity. Their cooperation and involvement played a significant role in the successful completion of this project.

**Mallik Gowda M (11C22CD006)**

## ABSTRACT

This AICTE Activity Report documents four community-oriented initiatives conducted to enhance digital awareness, environmental responsibility, public hygiene, and food safety among students and local communities. The activities were designed to address real-world challenges related to digital literacy, energy management, waste disposal, and food preservation, all of which have significant social, economic, and environmental implications. The first activity, *facilitating 100% Digitalized Money Transactions*, focused on educating participants about UPI, mobile banking, QR payments, and cybersecurity practices to build confidence in adopting cashless transactions. The second activity, *Reduction in Energy Consumption*, emphasized practical methods for minimizing electricity usage through awareness on efficient appliances, behavioural changes, and conservation techniques. The third activity, *Developing and Managing an Efficient Garbage Disposal System*, created awareness on waste segregation, composting, recycling, and the importance of proper handling of hazardous and e-waste to promote cleaner and healthier surroundings. The fourth activity, *Food Preservation and Packaging*, provided hands-on demonstrations of scientific preservation methods—such as drying, refrigeration, pickling, and airtight packaging—along with guidance on hygienic handling and eco-friendly storage practices.

Across all four activities, a structured methodology was followed, including surveys, presentations, practical demonstrations, supervised practice sessions, community outreach, and feedback analysis. The impact assessments show that participants gained substantial knowledge, adopted improved practices, and demonstrated increased awareness in their households and communities. Collectively, these activities contributed to promoting digital empowerment, reducing energy wastage, improving environmental hygiene, minimizing food spoilage, and supporting sustainable living. The report highlights how targeted awareness programs can drive meaningful behavioural change and strengthen community well-being.

## Table of Contents

Sl. No.	Title	Page No.
1	<b>Acknowledgement</b>	i
2	<b>Abstract</b>	ii
3	<b>Activity 1: Facilitating 100% Digitalized Money Transaction</b>	1–12
	Introduction	2
	Objectives	3
	Problem Statement	4
	Methodology	5
	Details of Activity Carried Out	7
	Relevance to Society	8
	Photos of the Activity	9
	Feedback & Impact Analysis	10–11
	Conclusion	12
4	<b>Activity 2: Reduction in Energy Consumption</b>	13–26
	Introduction	14
	Objectives	15
	Methodology	17–20
	Experiments & Demonstrations	20–22
	Photos of the Activity	23
	Feedback & Impact Analysis	24–25
	Conclusion	26
5	<b>Activity 3: Developing &amp; Managing Efficient Garbage Disposal System</b>	27–39
	Introduction	28
	Problem Statement	31
	Project Implementation	32–35
	Relevance to Society	35
	Photos of the Activity	36
	Feedback & Impact Analysis	37–38
	Conclusion	39
6	<b>Activity 4: Food Preservation and Packaging</b>	40–53
	Introduction	41
	Objectives	42
	Problem Statement	43
	Methodology	44–45
	Project Implementation	46–48
	Relevance to Society	49
	Photos of the Activity	50
	Feedback & Impact Analysis	51–52
	Conclusion	53
